

Benefits of ACPA Southwest Membership

We are the collective voice of the concrete pavement industry, with a seat on agency panels and committees

Agency and government advocacy

Long-life pavement research and design specifications

Annual Caltrans/NDOT/NMDOT pavement conferences

Quarterly Quality Pavement Meetings with State Highway Departments/Contractor/Agency interface

Smoothness surface research and development for quiet pavement

Diamond grinding promotion for pavement rehabilitation and noise mitigation

FAA Airport Workshops for pavement design, maintenance and rehabilitation

StreetPave and AirPave design software programs for streets, local roads and airports

About the ACPA

ACPA was organized to address common needs, solve common problems and accomplish goals related to research, legislative advocacy, market development, local promotion, design, construction and best practices of concrete pavements for airports, highways, streets and local roads/parking facilities.

Member participation and involvement provides direction to the ACPA team. You can be a part of the guiding action on critical issues affecting business and market development, technical standards and product performance.

ACPA and its network of Chapters and affiliated State Paving Associations is the recognized **voice** of the concrete pavement industry and the organization that provides representation on all matters involving the state of the industry today. ACPA maintains strong relationships with federal, state and local governments and agencies, as well as allied national organizations.

Initiatives and Support

Providing technical support programs and services with in-state staff engineers - experts in pavement technology and well-versed in local requirements

Recognizing outstanding projects and the people that build them through award programs

Sponsoring workshops and seminars that provide the latest pavement technology and innovation

Organizing promotion initiatives that enhance awareness of concrete pavement products, processes and solutions

Fostering industry cooperation with local government agencies, legislators, affiliated associations and organizations

Identifying and communicating changes and needs in the local marketplace

Expanding political involvement and public relations initiatives, associating with local public officials who influence the selection and specification of pavements

National Initiatives

Delivering timely, one-on-one project help for contractors seeking answers to job-site problems or evaluations of value engineering ideas

Developing reference tools and guide specifications related to concrete pavement design and construction

Developing education and training programs to share "best practices" for design and construction with engineers and contractors throughout the world

Actively partnering with technology and constructability including: the American Association of State Highway and Transportation Officials, Federal Aviation Administration, Federal Highway Administration, US Army Corps of Engineers

Pursuing innovation in concrete pavement design, construction and rehabilitation

Dowel Bar Design and Specification for highway pavement load transfer

Fast setting, high performance Portland Cement Concrete for highway slab replacement

Government Relations Advocacy

Advocating legislation that positively impacts the funding of infrastructure and the specific application of concrete pavements

Influencing legislative decisions on business-specific legislation on labor and environmental concerns

Monitoring executive orders and legislation in early stages to alert ACPA members on business opportunities and concerns

Promoting applied research

Serving as a resource to public officials on surface transportation and related paving issues.

Affecting transportation in your backyard requires a strong local voice backed by sound national initiatives. ACPA Chapter and State Associations serve as the recognized force leading local initiatives on behalf of ACPA members. Today, ACPA is positioned to impact your local business and market growth through advocacy and action.
